

FV100 Series Fill Valve

- Floating Ball Valve Technology
- High Flow Rate
- Anti-Blowout Stems Design
- Fully Machined from Stainless Steel & Aluminium Bar Stock
- Precision CNC Machined
- Specially Design for Bus & Truck Filling
- Easily Serviced
- Spare Part Kits Readily Available
- Extended Cycle Testing to Ensure Longevity
- Unique Patented Design Eliminates Cross Venting between the Fill & Vent Position
- Port Adaptor Options Available

NC100 Series Nozzles

- High Flow Rate
- Stainless Steel Internal Construction
- Fully Machined from Stainless Steel & Aluminium Bar Stock
- Specially Design for Car, Bus & Truck Fast Filling
- P30 & P36 Profiles Available
- Precision CNC Machined
- Serviceable
- Extended Cycle Testing to Ensure Longevity
- Hardened Segment Connection Style Increases Gripping Area Reducing Wear on Receptacle
